5.017 SHOE KIT, Brake With Facing, Metallic

The GM merchandising line of tune-up kits, shock absorbers, and brake sets are shipped direct to dealers from the source, and are not stocked at GM Parts Division Distribution Centers.
All orders are shipped freight prepaid.
Orders must be written on a special "on target" order form.
All purchases accrue toward dealers parts return reserve & advertising assistance reserve.
Purchases are not eligible for wholesale compensation or stock order allowance.
Merchandising line parts are warranted in accordance with current GM Parts Division Parts Policy.
Refer to GM Parts Division price schedule for merchandising line.

NOTE: Metallic linings are double sintered as compared to the single and much larger sintered cerametalix linings.

NOTE 1: Used on Nova w/H.D. Brks. for Year 1970 and 1972.

NOTE 3: Used on Nova (exc. H.D. Brks.).

NOTE Metallic linings are double sintered as compared to the single and much larger sintered cerametalix linings.

5.544 SHAFT, Rear Propeller (Shaft attaches to rear axle) (Passenger)

NOTE: The 1971 passenger car constant velocity design production propshafts for all models (except Police) are not serviced. The service replacement propshaft is identical to the production version with the exception that the slip yoke has been removed. The two U-joint bearing assemblies at this location are then held together using two clips with a special retaining strap. These parts are to be discarded when assembling the new propshaft for installation. Two snap rings part number 1456507 must be used to retain the bearing assemblies in the slip yoke.
Do not use the parts shipped with the service propshaft.

NOTE 1: For U-Joint repair kits use 1-5677659 (frt.) and 1-5698221 (rear).
NOTE 2: Length 61½" center line to center line of brgs. use w/strap retained rear trunnion.
NOTE 3: Length 60⅛" centerline of brgs. use w/strap retained rear trunnion.

6.164 SHAFT— BUSHING— NUT— BALL JOINT KIT, Steering Knuckle Upper Control Arm

NOTE: On late production assys. with untapped lubrication fitting holes, it is necessary to use self-tapping lube fittings or tap new threads for standard type lube fittings.

NOTE 1: Consists of 1 shaft, 2 bushings, 2 retainers, 2 washers, and 4 nuts.
NOTE 2: Consists of 1 shaft, 2 bushings, 2 retainers, 4 bolts, and 4 washers.
NOTE 3: 2 used front-2 used rear.
NOTE 4: Consists of 3 bolts, 6 washers, and 6 nuts.
NOTE 5: CAUTION this part is not to be used on 1969 or earlier models due to taper differences.
NOTE 6: It may be necessary to drill the new stud assembly and the control arm attaching holes to 21/64" diameter.
NOTE 7: Stud unit should not be drilled, and to proper utilize dealer stock of 6258152 the proper 1/4" nuts, bolts, and washers must be used.
NOTE 8: Consists of 1 shaft, 2 bushings rear, 2 retainers, 2 nuts, and 1 washer.
NOTE 9: Consists of 1 shaft, 2 bushings, 2 retainers, and 2 nuts.
NOTE 10: Consists of 1 shaft, 2 bushings (1) front and (1) rear, 2 retainers, 2 nuts, 1 washer.
NOTE 11: Consists of 1 shaft, 2 bushings (1) front and (1) rear, 2 retainers, 2 nuts.

NOTES

7.003 FRAME—MEMBER, Frame

The left hand side outer member will bear the frame identification with characters stamped ahead of the rear bumper bracket attaching slot.

The top line of the identification will provide the part number of the frame assembly, the name of the manufacturer (abbreviated, ie., Pontiac— Pon., A.O. Smith— S, Parish Pressed Steel— P.P.S.).

The bottom line will provide the month, day, year and shift number.

1969 COIL SPRINGS

A new system for release of front and rear coil springs will be used for the 1969 A, B, F and X cars. The assembly plants will use a computer to determine the correct spring based on the RPO equipment on the dealer order. It will also be put on an engineering drawing to Maintain engineering records.

Determination of the correct spring by dealer personnel will be as follows:

1. If the identification tag is still on the spring, Table A will give the part number.
2. If the identification tag is not available, it will be necessary to add the weight for all the RPO equipment on the vehicle. This is shown on Table A. (Only RPO's with 5 lbs. or more are given.)
3. After the extra weight of the vehicle is determined, Table C shows the identification letters of the required spring. These letters are used with Table B to determine the part number.

Example:

A 13646 Concours 4 Door Station Wagon with dual action tail gate is equipped with the following:

Weight to add

	Front	Rear	RPO	
	196	46	L35	V8 Engine - 396 Cu. In. - 325 HP
	23	9	M40	3-Speed Automatic Transmission
	* -2	7	A33	Electric Tail Gate Window
	30	0	N40	Power Steering
	2	14	V55	Luggage Carrier
Total	249	76		

*NOTE: Some options have negative value and must be subtracted instead of added.

1. The weights were obtained from Table B.
2. Table C for this model shows the spring requirement.
   Standard Springs - front - 249 # requires spring "GO"
   rear - All use spring "BB"
   Heavy Duty Springs - front - 249 # requires spring "GW"
   rear - All use spring "BG"
3. Table A would then be used to convert to part numbers and the customers requirements would be as follows:

	Front	Rear
Standard Springs	(GO)3952812	(BB)3949015
Heavy Duty Springs	(GW)3952818	(BG)3949006

The use of this system will present two additional advantages. Customer request of upgrading springs due to trunk loads, etc. can be easily accomplished. If there is a question of improper springs installed on the car, it can be easily checked.

1974 VEGA

Follow the three steps below to utilize the 1974 spring charts.
1. Select the model desired with the base spring weight on Chart "A".
2. Then select options accordingly shown on Chart "B" and add that weight to the base spring weight.

NOTE 1: This switch cuts off elect. supply to comp. at 29 degrees F. and below to protect comp. shaft seal assy. from damage.
NOTE 2: Used to cut out compressor during full throttle condition.
NOTE 3: 2nd design ident. by yellow paint.
NOTE 4: When using in place of 7930135 for 1973-74 part number 9345259 will be req.

11.561 ADJUSTER, Front Seat (Passenger) (Con't)

NOTE 3: Used on vehicles built after March 15, 1971
NOTE 4: Used on vehicles built after April 1, 1971
NOTE 5: When using on past models it is necessary to use knob 7778975.
NOTE 6: To eliminate assist spring chatter, engineering has redesigned the presently specified seat adjusters by removing the component assist spring support and replacing the $4^{27}/_{64}$ inch assist spring (1st design) with a new longer $8^{39}/_{64}$ inch assist spring (2nd design) to attach to a notch in the front of lower channel.

NOTES

14.875 SEAT BELT UNIT—SHOULDER STRAP UNIT

NOTE: Components of Seat Belt Assemblies are made available separately on only a selective basis. (To assure that service part seat belt assemblies perform in the same manner as original equipment), it is not recommended that integral retractors, buckles and inserts which are sewn in, (be replaced separately.) Many designs of metal inserts and buckles may look alike (but) may "false-latch" one into the other (and may release prematurely rather than being capable of providing the intended restraining forces.)

NOTE: See Dealer Price Schedule (P&A 26) for applicable prices.

NOTE: All seat belt and strap unit packages contain all necessary parts for installation exc. stowage provisions.

INTRODUCTION

This **ILLUSTRATION CATALOG** has been compiled to assist in the location and identification of service parts.

The illustrations herein may not always show the exact part required, however, for identification purposes the group number or noun name can be readily located from an view covering a typical illustration.

The layout of the information contained in this publication is such that the illustrations can be removed for combining with the Chassis and Body Parts Catalog Sections by groups. The "single" catalog concept can be maintained using this system, or the separate Illustration Catalog and Parts Listings Catalogs can be used.

During each calendar year complete reprints of the catalog are published as part of the Catalog Revision Service. New or revised illustrations are mailed to dealers subscribing to the revision service as they are scheduled.

All specifications and illustrations contained in this publication are based on the latest product information available at the time of printing. General Motors Parts Division reserves the right to make changes at any time without notice in data, specifications, material and models.

Due to Engineering and or part number changes, all part number application herein should be verified by refering to the Parts Catalog.
