INTRODUCTION

This Parts Catalog has been compiled for the purpose of locating, identifying, and ordering replacement parts. All data and specifications contained in this publication are based on the latest product information available at the time of printing. General Motors Parts Division reserves the right to make changes at any time without notice in data, price, specifications, materials, material, and model. The "List Prices" shown are suggested prices only for sales to consumers.

Replacement parts are listed in this catalog under 16 major groups, as shown on the content page. Individual parts are assigned a Prime Group number, the first numeral of the group identifies the main unit it is affiliated with, and following the decimal is the Sub-Group number under which all parts of the same name and function are listed. For example, Group 0.519 Camshaft. The "0" denotes that it is an Engine Part, "519" the sub-group where all Engine Camshafts are listed. Related parts may also be found in the same group. Within each group, parts are listed by model year, vehicle series, part number, number used per vehicle or R.H.-L.H. designation, suggested list price, part name and description.

Parts may be used in different locations on the car requiring the listing of the part number in more than one group. When this "Cross Referencing" occurs, the prime group is shown in brackets i.e. (1.850) in the description column.

To locate a listing for a part, determine the model vehicle and refer to the group number identifying it, which may be determined by using any of the following methods.

A. When the name of the part is known, consult the ALPHABETICAL INDEX, which lists parts by noun name and Group Number where part is listed.

B. Reference may be made to the ILLUSTRATION CATALOG, where Group Numbers, noun names or part numbers are shown.

C. When a part number is known and model application or a similar part is required, consult the DEALER PRICE SCHEDULE for the Group Number to locate the part in the Parts Catalog.

Parts having application or used with optional equipment are identified by Option Number or abbreviation of option. Familiarity with Option Numbers will assist in determining correct part required.

Complete identification for models and options listed in this catalog will be found preceding the alphabetical index.

Service part numbers are assigned to individual parts that make up an assembly used in the production of models. Certain items may not be listed, such as short tubing parts or fuel lines that can be made up by dealers from bulk material or attaching parts may be included in packages with the major assembly and not listed separately.

Right Hand and Left Hand parts are so designated from the driver's position when seated in the car.

SEQUENTIAL NUMBER

Models 11000 & 21000 (Nova & Ventura II) will be numbered in continuous sequence starting with 100001 at Willow Run. At Van Nuys, they will be numbered separately in continuous sequence starting at 100001. Norwood will number the Nova in continuous sequence starting with 300001.

Model 12000 ("F" Body) will be numbered continuous starting with 100001.

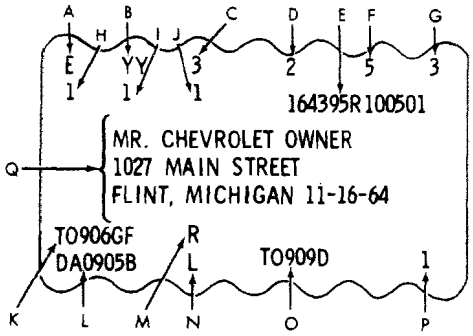
Models 13000 ("A" Body includes Monte Carlo) will be numbered continuous starting with 500001 at each Assembly Plant.

Models 15-16000 ("B" Body) will be numbered continuous starting with 100001 at each Assembly Plant. "B" Body built by G.M. of Canada will not be allocated a separate closed number sequence but will be numbered along with regular Canadian Production. Canadian numbers will start with 100001.

Model 19000 ("V" Body) at St. Louis will be numbered continuous starting with 500001.

Model 14000 ("H" Body) will be numbered continuous starting with 100001.

1965-67 CHEVROLET PROTECT-O-PLATE



The Chevrolet Protect-O-Plate furnished with all vehicles is imprinted at the plant with identifying information covering the majority of standard and RPO equipment. The exact type of engine, transmission, and rear axle with which a vehicle is equipped may be obtained from the plate, as well as exterior color, month of vehicle production and basic vehicle identification. All passenger cars have interior trim information and all passenger models except Corvette include information on major extra cost RPO equipment.

Information is stamped on the plate in two forms;

1. Production identification numbers, such as engine production code number.
2. RPO numbers which are coded with a single digit (passenger except Corvette).

The type of information available on the plate furnished with a given vehicle is shown in the following chart.

Passenger Car Identification Number Explanation

A five digit numbering system will be used on all 1967-69 passenger cars. The basic number groups are:

10000 Series - Corvair
11000 Series - Chevy II
12000 Series - Camaro
13000 Series - Chevelle
15000 Series
16000 Series
- Chevrolet
19000 Series - Corvette

The first two digits denote the vehicle series. The third indicates base engine equipment, and the two remaining numbers identify the body style. When the third digit is odd (1, 3, 5, 7), the base engine is an L-4 or L-6. When the third number is even (2, 4, 6, 8), the base engine is a V-8.

The complete serial number consists of the above model identification, year of manufacture, plant designation, and sequence number.

EXAMPLE: 164397F100500

(16439)	(7)	(F)	(100500)
Impala V-8 4-Dr. Sport Sedan	1967 Model	Flint Built	500th 1967 Chevrolet built at Flint

21-2400	L	T-Cleveland	Powerglide
21-2400	L	U-Cleveland	Powerglide
CORVETTE	L	V-Cleveland	Powerglide

EXAMPLE:	Model Year Designation	Type and Plant	Number Unit
	L	A	001030
	L	T	001030

TRANSMISSION IDENTIFICATION JULY 1, 1953 TO 1962

Plant and Type Designation Prefix	Plant	Type Transmission
W	Warner Gear	4-Speed
S	Saginaw	3-Speed, Overdrive*
C†	Cleveland	Powerglide
B†	Toledo	Turboglide Powerglide (Corvair)

*To identify heavy duty 3-speed transmission the letter "H" will be used as a suffix to production date in 1953. Overdrive distinguished from 3-speed by physical appearance only.

NOTE: To identify Day (D) or Night (N) shift.

EXAMPLE:	Plant and Type	Month	Day
	S	3	04

The above designation (S304) indicates the transmission was built at the Saginaw plant on March 4.

*Overdrive distinguished from 3-SPD. by physical appearance only. The above transmissions (except Warner Gear) will carry a production code number such as:

Plant and Type	Month	Day	Shift
C	11	16	N

The above designation indicates this Powerglide transmission was built at the Cleveland plant on the November 16 night shift.

The Warner Gear transmissions will carry a production code number such as:

Plant and Type	Month	Day	Year	Shift
W	G	10	3	1

The above designation indicates this 4-speed transmission was built at Warner on July 10, 1963--first shift.

NOTE 1: May contain Nodular iron type Crankshaft. It is necessary to install a harmonic balancer on vehicles which do not have an existing balancer.

NOTE 2: It may be desirable to replace camshaft gear with 3788508 to eliminate possible objectionable noise level.

NOTE 3: When using on models prior to 1968 it will be necessary to use 1968 Oil Pan Gasket Unit.

NOTE 4: 1967 engines with date stamp FO619 thru end of production incorporate 1968 parts as follows: Crankshaft Rear Bearing Oil Seal, Rear Bearing Cap, Oil Pan Gasket. Refer to parts in their groups.

NOTE Includes block, crankshaft, camshaft, timing gears, pistons and connecting rods. Bolts on front end plate may have to be cut off flush when installing on 6 cyl. pass.

0.033 PARTIAL ENGINE, Engine

NOTE 1: When using on models with A.T. it will be necessary to remove clutch pilot bearing from crankshaft.

NOTE 2: Some early 1968 passenger models use 1967 engines. These will meet 1968 spec. except as follows: Cylinder and Case Assy., Conn. Rod Assy., Crankshaft Assy., Main and Conn. Rod Bearings. Replaceable element Oil Filters, by-pass valve and related parts. These can be identified by the oil filter. (1968 use the throw away type oil filter) Refer to the above 1967 components in their group).

NOTE 3: The following items are deleted cm/shf, cm/shf & cr/shf sprockets, frt cvr, timing chain, misc retaining hardware & eng oil supp 1051858.

NOTE 4: Includes block, crankshaft, camshaft, timing gears, pistons and connecting rods.

NOTE 1: When using 3860451 in place of 3860447 cut approx. $2^{7}/_{32}$" from rad. end and $1^{1}/_{4}$" from eng. end.

NOTE 2: It may be necessary to cut 2" from engine end of hose.

NOTE. "INLET" hose is used between top of radiator and engine coolant outlet. "OUTLET" hoses (group 1.173) are used between bottom of radiator and cylinder block.

NOTE Some hoses have been replaced with hoses of a different length or configuration. This replacement hose, in many instances will require cutting, using old part as guide.

NOTE "Outlet" hoses are used between bottom of radiator and cyl. block. "Inlet" hose (group 1.159) is used between top of radiator and eng. coolant outlet.

NOTE Some hoses have been replaced with hoses of a different length or configuration. This replacement hose, in many instances, will require cutting, using old part as guide.

1.219 RADIATOR, Engine Cooling

NOTE 1: Must also be used as a replacement for Aluminum Radiator. Inlet Hose, 3788533, and Outlet Hose, 3792813, must also be used when using this core as a replacement for Aluminum Radiator.

NOTE 2: When using on models not equipped with Heavy Duty Radiator or Air Cond., it will be necessary to use hose 3850687.

NOTE 3: When using 3003908 in place of 3153508 it is necessary to remove trans. oil cooler line fittings to rad. and assy. fittings 137398.

NOTE: For drain cocks see Standard Parts Group 8.951.

NOTE In some cases standard radiators are replaced by heavy duty radiators and radiators with oil coolers can be used in place of ones without oil coolers.

For 1972-75 usage see chart at end of group.

2.270 KITS, Engine Tune-Up

The GM Merchandising Line of Tune-Up Kits, Shock Absorbers, and Brake Sets are shipped direct to dealers from the source, and are not stocked at GM Parts Division Distribution Centers.

There is a required minimum order quantity. Combination Tune-Up Kits, Brake Sets and Shocks orders may qualify based on weight.

All orders are shipped freight prepaid.

Orders must be written on a special order form which allows scheduling of four dealer shipments. Specific weights and qtys. are specified on order form.

All purchases accrue toward Dealer's parts return reserve.

Purchases are not eligible for wholesale compensation or stock order allowance.

GM Merchandising Line Parts are not returnable to GM Parts Division.

Merchandising Line Parts are warranted in accordance with current GM Parts Division parts policy.

2.480 HARNESS, Chassis Wiring (segmented)

NOTE 1: Includes wires for front fender running lamps. If not used with running lamps cut and tape wires.
NOTE 2: Tape back fender light wires if necessary. DO NOT CUT.
NOTE 3: It may be necessary to coil and tape excess wire.
NOTE 4: When using on models without powerglide it will be necessary to cut off neutral safety switch terminals, strip wires and splice together or use jumper terminal 2984503. Solder and tape for proper instulation.
NOTE 5: It may be necessary to cut off ctsy. lamp sockets and tape back wires.
NOTE 6: It may be necessary to remove 14 ga. brown wire from heater control connector and use for A/C Feed. Add conn. body pin, 2977253-tape unused wires out of the way.
NOTE 7: When 8908140 is used in place of the first design harness it will be necessary to discard the steering column harness on the vehicle and replace it with 8908140.

2.575 SWITCH— FLASHER ASSY.— KNOB— LAMP ASSY.— LENS ASSY.— BEZEL— GASKET— NUT— SOCKET ASSY.— BUMPER— RETAINER— SCREW, Hazard Flasher

NOTE 1: Cut away old side marker lamp socket and splice in new socket leads. Old socket is part of fwd. and rear wrg. harness.
NOTE 2: Amber lens.
NOTE 3: White lens.
NOTE 4: Cut away old side marker lamp socket and splice in new socket leads. Old socket is part of fwd. and rr. wrg. harness. Use with molded on socket.
NOTE 5: When using in place of 911052 remove the bezel and two studs and discard.
NOTE: Lamp Socket Replacement, it is necessary to carefully check the parts catalogs for correct model application when replacing lamp socket assemblies. If incorrect sockets are used for replacement, the bulb filament will be in the wrong location with respect to the lens and/or reflector. As a result, the lamp may fail to meet the required lighting standards.

It is necessary to carefully check the parts catalogs for correct model application when replacing lamp socket assemblies. If incorrect sockets are used for replacement, the bulb filament will be in the wrong location with respect to the lens and/or reflector. As a result, the lamp may fail to meet the required lighting standards.

2.596 SOCKET— CONNECTOR— WIRE ASSY., Parking Lamp

It is necessary to carefully check the parts catalogs for correct model application when replacing lamp socket assemblies. If incorrect sockets are used for replacement, the bulb filament will be in the wrong location with respect to the lens and/or reflector. As a result, the lamp may fail to meet the required lighting standards.

It is necessary to carefully check the parts catalogs for correct model application when replacing lamp socket assemblies. If incorrect sockets are used for replacement, the bulb filament will be in the wrong location with respect to the lens and/or reflector. As a result, the lamp may fail to meet the required lighting standards.

4.003 TURBO-HYDRAMATIC (250, 350, 375, 400)

The Turbo Hydra-Matic Section of this catalogue includes two types of three-speed automatic transmission, the T.H. 350 and the T.H. 400.
To Identify the Transmission use the following:
T.H. 350— The carburetor to transmission throttle control is CABLE ACTIVATED.
The cable runs from the accelerator control lever to the RIGHT side of the transmission.
T.H. 400— The carburetor to transmission throttle control is ELECTRICALLY ACTIVATED.
The cable runs from the switch at the carburetor to the LEFT side of the transmission.

4.003 TRANSMISSION, (less hand brake) (Turbo Hydramatic 375, 400 Transmission)

4.005 GASKET KIT— OVERHAUL KIT— RING KIT, Transmission

NOTE 2: Consists of 1 each seal assy. park lock and range selector shift, inter. clutch accum. piston cover, extension to case governor cover, low and reverse clutch piston, lower, outer, and center inter., clutch piston outer and inner, direct clutch piston inner, outer and center forward clutch piston outer and inner, output shaft, oil pump outer and inner oil filler tube, and detent cable. Also 8 seals, oil pump to transmission case bolt, 1 each "O" rings speedo. driven gear fitting, and vacuum modulator. Also 1 each gasket valve body to spacer plate, oil pan to trans. case, oil pump screen, oil to case and valve body spacer plate.

NOTE 3: Consists of (1 each) gasket and seal unit, oil seal ring unit, seal assy. extension oil (5 each) plate assy., low and reverse drive (faced), forward clutch driven (faced) (3 each) plate assy., low and reverse drive (faced) (4 each) plate assy. direct clutch drive.

NOTE 4: Consists of 6 center support and pump cover seals, 1 front servo piston seal, 1 front accumulator piston seal, 1 accumulator piston seal, 1 rear accumulator piston seal.

NOTE 5: Consists of 1 ring pump to case seal, 8 "O" ring pump body bolt seals, 8 pump body bolt washers, 1 pump cover to case gasket, 1 "O" ring output shaft seal, 1 reverse servo piston seal, 1 rear servo cover gasket, 1 governor cover gasket, 1 "O" ring parking pawl shaft seal, 2 manual shaft "O" rings, 1 manual shaft seal assy., 2 vacuum modulator and connector seals, 1 valve body to spacer gasket, 1 case to spacer gasket, 1 solenoid valve gasket, 1 "O" ring strainer seal, 1 trans. oil pan gasket, 1 case extension to case gasket $1^{23}/_{64}$" dia. parking shaft plug, 1 filler tube "O" ring seal.
