Introduction

Welcome to the SNG Barratt Jaguar XJ6/12 Parts Catalogue

Following the Worldwide success of our Definitive Jaguar Owners Catalogue which covers over 20 classic models in one 300 page publication we have taken the decision to release a range of more detailed catalogues for each of the more popular models that we cover. This will allow us to better illustrate the parts we have available and to make identification of the item required a little easier.

How to use this catalogue...

Use the illustration in each section to identify the component that you require. Note the indicated item number and find the corresponding number in the section listing. There you will see our part number for that item and to it's right the quantity required per car. Very often this will be the original Jaguar part number, thus allowing you to refer to an original factory parts catalogue if more detail is required.

Each part number is listed in our price list. This listed price is per item and is plus VAT except in the case of books and other VAT exempt items.

If you then quote this part number when contacting our sales department, we will be able to confirm the cost and whether we have the part in stock.

If you cannot conclusively identify the item that you require then please call and we will to assist you. Our staff have many years of experience with all aspects of the Jaguar marque and may have the just the answer...

Your customer number

Upon dealing with SNG Barratt for the first time you will be allocated a customer number. In many cases this will be your UK postcode. If you are overseas your sales advisor will use either your zip code or a number made using your surname. This customer number can either be found on your invoice or simply by asking the person serving you. The ability to provide your customer number when contacting our sales department will allow us to access your information far faster and serve you even more efficiently.

Customer number.....

Your vehicle details

Please complete this section as accurate vehicle information at your finger tips will prove to be invaluable. Very often identifying the correct part for you car can be all down to chassis or engine number. These details can best be found on the car itself, as registration documents can often prove to be incorrect due to engine swaps and vehicle upgrades that the DVLA have not been advised of. Please refer to the Vehicle Identification section on page 2 if you wish to cross reference any information.

8. Goodridge stainless steel braided brake hoses

If you are planning to upgrade your brake system, it may be a good idea to change the original rubber brake hoses at the same time, as the tradional brake hoses are often the weak point in any braking system tending to swell slightly when the brake pedal is pushed. The result of which is wasted hydraulic pressure between the brake master cylinder and the caliper. Because the stainless steel brake hoses don't expand when the pedal is pushed, all the hydraulic pressure reaches the caliper, obviously resulting in greater braking efficiency with less pedal effort for the driver.

Dayton Bolt-on Wire Wheel

These bolt-on wire wheels have the classic styling and quality of authentic wire wheels with the convenience of direct bolt installation. Dayton bolt-on wire wheels are manufactured to exacting tolerances and their patented forged steel center hubs are custom drilled. The patented construction also features stainless steel spokes and four-layer nickel-chrome plating.

1. Fuel tank

XJ6/12 remote pumps	RH	CAC5522/1	1
	LH	CAC5523/1	1

± These tanks will fit all models as the basic pressing shape is the same throughout the range. However if your sender unit fits at the front of the tank nearest the wheelarch it will be necessary to replace them with the later units that fit at the rear of the tank behind the rear lamp DAC5498 RH & DAC5499 LH. A small amount of modification may also be required to the fuel pipes, but rest assured they will fit.

Electronic Ignition Conversion Kits

Buy on-line at www.sngbarratt.com

The constant changing of points and condensers on any Jaguar or Daimler is both inconvenient and time consuming. The later Jaguars all feature electronic ignition which comes with the obvious advantages of greater reliability, economy and maintenance free motoring. The kits we provide are all produced by leading manufacturers and are built to out last many of the cheaper kits that are available from many of our competitors! They are fairly easy to fit and require no further adjustment once they are in situ, so fit one and forget it!

Ignitor Electronic Ignition Kits

A solid-state electronic system... "never change points again!"

Test results show the Ignitor delivers twice the voltage to the spark plugs, increasing horsepower, fuel economy and plug life.

A 2:1 improvement over point type systems in current fall time for increased coil output.

System is designed for use with most point-type coils.

Rotating cobalt magnets, mounted on the distributor shaft, trigger an electronic switching module (Hall effect integrated circuit)
...no points to burn, pit and corrode
...no moving and rubbing parts to wear out.

Electronics are molded in epoxy, eliminating deterioration from dirt, oil, grease or moisture (better foul weather performance).

Fits entirely inside the distributor, no "black box" to clutter your engine compartment. Stable timing... no need for any further adjustments.

No complicated wiring makes installations easy.
