

Códigos de erro - DCT Codes

Este documento é uma compilação dos vários códigos de erro.

Tópico original: <http://www.gtcteamclub.com/forum/index.php/topic,5005.0.html>

Aqui está uma forma fácil e barata de, caso existam códigos de erro armazenados, os vermos. Sem necessidade de ir à oficina. Aliás, muitas oficinas nem saberão isto...

- Carregar no pedal de travão e acelerador até ao fundo e ao mesmo tempo.
- Rodar a chave até às luzes aparecerem, mas sem arrancar com o carro!

No display onde aparecem os Kms, vai aparecer "ECN" (error code number) e em baixo os códigos de erro armazenados. Aparecem um a seguir ao outro. No fim, aparece novamente os Kms.

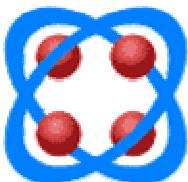

Os primeiros 4 dígitos indicam a falha e os últimos 2 indicam um valor.

Por exemplo, ECN 161450: problema com a comunicação entre o imobilizador e o transponder da chave.

Se não surgir nenhum código, não há nenhum erro registado.

Existem vários códigos, sendo alguns específicos de cada marca e outros gerais. Assim, coloco aqui todos os códigos que encontrei, de forma a que, caso seja necessário, haja uma maior probabilidade de estar aqui o código em causa, em alguma destas listas.

A melhor forma de encontrar algum código é mesmo fazendo uma pesquisa nestas listas.
