HOW TO USE THE CATALOGUE

To use the catalogue more efficiently, take into account the following points :

1- Knowing the reference number, see at the end of the catalogue the numerical index, ordered from the smallest to the biggest. Once you have the reference, next to it, you will see a number that corresponds to the page where is situated the reference.

2- Knowing where this reference is mounted, or the groups to which it belongs, see the figures index and situate the corresponding figure number.

3- An assembly part can be searched in page n° 166 "Assembly Parts" or in the corresponding group.

4- When you look for a reference, take into account the following points :

- a)- Vehicle version : convertible or metallic roof, standard or de luxe, injection or carburation, left hand or right hand driving.
- b)- Chassis, engine or gearbox number.
- c)- If it is a national or a Japanese part.
- d)- If the part is in colour, you must look for the one of its colour or another one which is prepared for being painted.

5- When you change a part of an assembly, be sure that the new part belongs to the same supplier and assembly. The mounting of a part different from the one specified can create operation problems.

6- Specifications codes.

This catalogue contains the parts of the model designed for the following specifications :

E01, E02, E04, E10, E11, E18, E19, E20, E22, E25, E29, E34, E39, E41, E44, E53, E54, E56, E57, E89, E90, E94 and E99.

8- Meaning of the expressions appearing in observations and that do not exist in the abbreviations paragraph :

ALTERN. = indicates that, for this position, there are more than a reference which can be mounted in the same position.

D = part mounted from the chassis number indicated.

VALEO = indicates the part manufacturer name.

H = part mounted until the chassis number indicated.

JA = standard vehicle.

COMMENT UTILISER LE CATALOGUE

Pour utiliser plus rapidement ce catalogue, tenez compte des observations suivantes :

1- Connaissant le numéro de référence, aller à la fin du catalogue où se trouve l'index numérique, ordonné dans un ordre croissant. Une fois située la référence, vous observerez qu'à la suite apparaît un numéro de page où se trouve la référence.

2- Sachant où se monte une référence ou le groupe auquel elle appartient, aller à l'index des figures et situer le numéro de figure correspondant.

3- Un grand ensemble peut être cherché à la page n° 166 " Grands Ensembles " ou dans le groupe correspondant.

4- Lorsque vous cherchez une référence, tenez compte de :

- a)- Version du véhicule : toit métallique ou convertible, standard ou luxe, injection ou carburation, conduite à droite ou à gauche.
- b)- Numéro de châssis, moteur ou boîte de vitesses.
- c)- S'il s'agit d'une pièce nationale ou japonaise.
- d)- Si la pièce est de couleur, il faut chercher celle de sa couleur ou celle qui est préparée pour être peinte.
