# Focus Wiring Diagrams

## Table of Contents

### Group 1 – General Information

#### General Information

|                               |             |
|-------------------------------|-------------|
| Table of Contents .....       | 100-00-00-1 |
| Systems Overview .....        | 100-00-01-1 |
| Index .....                   | 100-00-02-1 |
| Introduction .....            | 100-00-03-1 |
| Symbols .....                 | 100-00-04-1 |
| Wiring Harness Overview ..... | 100-00-06-1 |

### Group 2 – Chassis

#### Brake System

|                         |              |
|-------------------------|--------------|
| Anti-Lock Control ..... | 206-09A-00-1 |
| Anti-Lock Control –     |              |
| Stability Assist .....  | 206-09C-00-1 |

#### Steering System

|                      |             |
|----------------------|-------------|
| Power Steering ..... | 211-02-00-1 |
|----------------------|-------------|

### Group 3 – Powertrain

#### Engine

|                                   |              |
|-----------------------------------|--------------|
| Engine Cooling – 1.6L (Z6) .....  | 303-03A-00-1 |
| Engine Cooling –                  |              |
| 1.8/2.0L Duratec-HE (MI4) .....   | 303-03B-00-1 |
| Engine Cooling –                  |              |
| 2.0L Duratorq-TDCi (DW) Diesel .  | 303-03C-00-1 |
| Fuel Charging and Controls –      |              |
| 1.6L (Z6) .....                   | 303-04A-00-1 |
| Fuel Charging and Controls –      |              |
| 1.8/2.0L Duratec-HE (MI4) .....   | 303-04B-00-1 |
| Fuel Charging and Controls –      |              |
| 2.0L Duratorq-TDCi (DW) Diesel .  | 303-04C-00-1 |
| Starting System – 1.6L (Z6) ..... | 303-06A-00-1 |
| Starting System –                 |              |
| 1.8/2.0L Duratec-HE (MI4) .....   | 303-06B-00-1 |
| Starting System –                 |              |
| 2.0L Duratorq-TDCi (DW) Diesel .  | 303-06C-00-1 |
| Engine Ignition – 1.6L (Z6) ..... | 303-07A-00-1 |
| Engine Ignition –                 |              |
| 1.8/2.0L Duratec-HE (MI4) .....   | 303-07B-00-1 |
| Glow Plug System –                |              |
| 2.0L Duratorq-TDCi (DW) Diesel .  | 303-07C-00-1 |

#### Electronic Engine Controls –

|                                  |              |
|----------------------------------|--------------|
| 1.6L (Z6) .....                  | 303-14A-00-1 |
| Electronic Engine Controls –     |              |
| 1.8/2.0L Duratec-HE (MI4) .....  | 303-14B-00-1 |
| Electronic Engine Controls –     |              |
| 2.0L Duratorq-TDCi (DW) Diesel . | 303-14C-00-1 |
| Automatic Transmission .....     | 307-01-00-1  |
| Manual Transmission –            |              |
| manual transmission (MPS6) ..... | 308-00-00-1  |
| Speed Control .....              | 310-03-00-1  |

### Group 4 – Electrical

#### Climate Control System

|                                     |              |
|-------------------------------------|--------------|
| Heating and Ventilation .....       | 412-02A-00-1 |
| Air Conditioning – without EATC ... | 412-03-00-1  |
| Air Conditioning – with EATC .....  | 412-03-00-6  |

#### Instrumentation and Warning Systems

|                                     |              |
|-------------------------------------|--------------|
| Instrument Cluster and Panel        |              |
| Illumination .....                  | 413-00-00-1  |
| Instrument Cluster .....            | 413-01-00-1  |
| Horn .....                          | 413-06-00-1  |
| Clock .....                         | 413-07-00-1  |
| Parking Aid .....                   | 413-13-00-1  |
| Generator and Regulator – 1.6L (Z6) | 414-02A-00-1 |
| Generator and Regulator –           |              |
| 1.8/2.0L Duratec-HE (MI4) .....     | 414-02B-00-1 |
| Generator and Regulator –           |              |
| 2.0L Duratorq-TDCi (DW) Diesel .    | 414-02C-00-1 |

#### Audio Systems

|                  |             |
|------------------|-------------|
| Audio Unit ..... | 415-01-00-1 |
| Speakers .....   | 415-03-00-1 |

#### Lighting

|                                     |              |
|-------------------------------------|--------------|
| Exterior Lighting – Headlamps ..... | 417-01-00-1  |
| Exterior Lighting –                 |              |
| Headlamp leveling .....             | 417-01-00-3  |
| Exterior Lighting – Stop Lamps .... | 417-01-00-9  |
| Exterior Lighting –                 |              |
| Turn Signal Lamps .....             | 417-01-00-13 |
| Exterior Lighting –                 |              |
| Position and Parking Lamps .....    | 417-01-00-21 |
| Exterior Lighting –                 |              |
| Licence plate illumination .....    | 417-01-00-23 |

|                                               |              |
|-----------------------------------------------|--------------|
| Exterior Lighting – Fog lamps . . . . .       | 417-01-00-25 |
| Exterior Lighting – Reversing lamps . . . . . | 417-01-00-27 |
| Interior Lighting . . . . .                   | 417-02-00-1  |

### Electrical Distribution

|                                         |             |
|-----------------------------------------|-------------|
| Module Communications Network . . . . . | 418-00-00-1 |
|-----------------------------------------|-------------|

### Electronic Feature Group

|                                                       |              |
|-------------------------------------------------------|--------------|
| Anti-Theft – Active . . . . .                         | 419-01A-00-1 |
| Anti-Theft – Passive . . . . .                        | 419-01B-00-1 |
| Multifunction Electronic Control<br>Modules . . . . . | 419-10-00-1  |

## Group 5 – Body and Paint

### Chassis

|                                                                               |              |
|-------------------------------------------------------------------------------|--------------|
| Rear View Mirrors . . . . .                                                   | 501-09-00-1  |
| Seating . . . . .                                                             | 501-10-00-1  |
| Glass, Frames and Mechanisms –<br>with front power windows . . . . .          | 501-11-00-1  |
| Glass, Frames and Mechanisms –<br>with front and rear power windows . . . . . | 501-11-00-3  |
| Glass, Frames and Mechanisms –<br>Heated rear window . . . . .                | 501-11-00-19 |

|                                                                               |              |
|-------------------------------------------------------------------------------|--------------|
| Glass, Frames and Mechanisms –<br>Heated power mirrors . . . . .              | 501-11-00-21 |
| Instrument Panel and Console . . . . .                                        | 501-12-00-1  |
| Handles, Locks, Latches and<br>Entry Systems – with central locking . . . . . | 501-14-00-1  |
| Handles, Locks, Latches and<br>Entry Systems – with double locking . . . . .  | 501-14-00-21 |
| Wipers and Washers . . . . .                                                  | 501-16-00-1  |
| Roof Opening Panel . . . . .                                                  | 501-17-00-1  |
| Safety Belt System . . . . .                                                  | 501-20A-00-1 |
| Supplemental Restraint System . . . . .                                       | 501-20B-00-1 |

## Group 7 – General Wiring Information

2.0L Duratorq-TDCi (DW) Die-  
sel  
303-14C-00-1

Automatic Transmission  
307-01-00-1

Manual Transmission – manual  
transmission (MPS6)  
308-00-00-1

Speed Control  
310-03-00-1

Generator and Regulator  
414-02A-00-1

Generator and Regulator –  
1.8/2.0L Duratec-HE (MI4)  
414-02B-00-1

Generator and Regulator – 2.0L  
Duratorq-TDCi (DW) Diesel  
414-02C-00-1

Heating and Ventilation  
412-02A-00-1

Air Conditioning – without EATC  
412-03-00-1

Air Conditioning – with EATC  
412-03-00-6

Instrument Cluster and Panel Illumination  
413-00-00-1

Instrument Cluster  
413-01-00-1

Horn  
413-06-00-1

Clock  
413-07-00-1

Audio Unit  
415-01-00-1

Speakers  
415-03-00-1

Module Communications Network  
418-00-00-1

Anti-Theft – Active  
419-01A-00-1

Anti-Theft – Passive  
419-01B-00-1

Multifunction Electronic Control Modules  
419-10-00-1

Instrument Panel and Console  
501-12-00-1

Safety Belt System  
501-20A-00-1

Supplemental Restraint System  
501-20B-00-1

Exterior Lighting – Stop  
Lamps  
417-01-00-9

Exterior Lighting – Turn Signal  
Lamps  
417-01-00-13

Exterior Lighting – Position  
and Parking Lamps  
417-01-00-21

Exterior Lighting – Licence  
plate illumination  
417-01-00-23

Exterior Lighting – Fog lamps  
417-01-00-25

Exterior Lighting – Reversing  
lamps  
417-01-00-27

Interior Lighting  
417-02-00-1

Roof Opening Panel  
501-17-00-1

Glass, Frames and Mechan-  
isms – Heated rear window  
501-11-00-19

Parking Aid  
413-13-00-1

Seating  
501-10-00-1

Rear View Mirrors  
501-09-00-1

Glass, Frames and Mechan-  
isms – Heated  
power mirrors  
501-11-00-3

Glass, Frames and Mechan-  
isms – with front power win-  
dows  
501-11-00-1

Glass, Frames and Mechan-  
isms – with front and rear power  
windows  
501-11-00-3

Handles, Locks, Latches and  
Entry Systems – with central  
locking  
501-14-00-1

Handles, Locks, Latches and  
Entry Systems – with double  
locking  
501-14-00-21

Anti-Lock Control  
206-09A-00-1

Anti-Lock Control –  
Stability Assist  
206-09C-00-1

Power Steering  
211-02-00-1

Exterior Lighting – Headlamps  
417-01-00-1

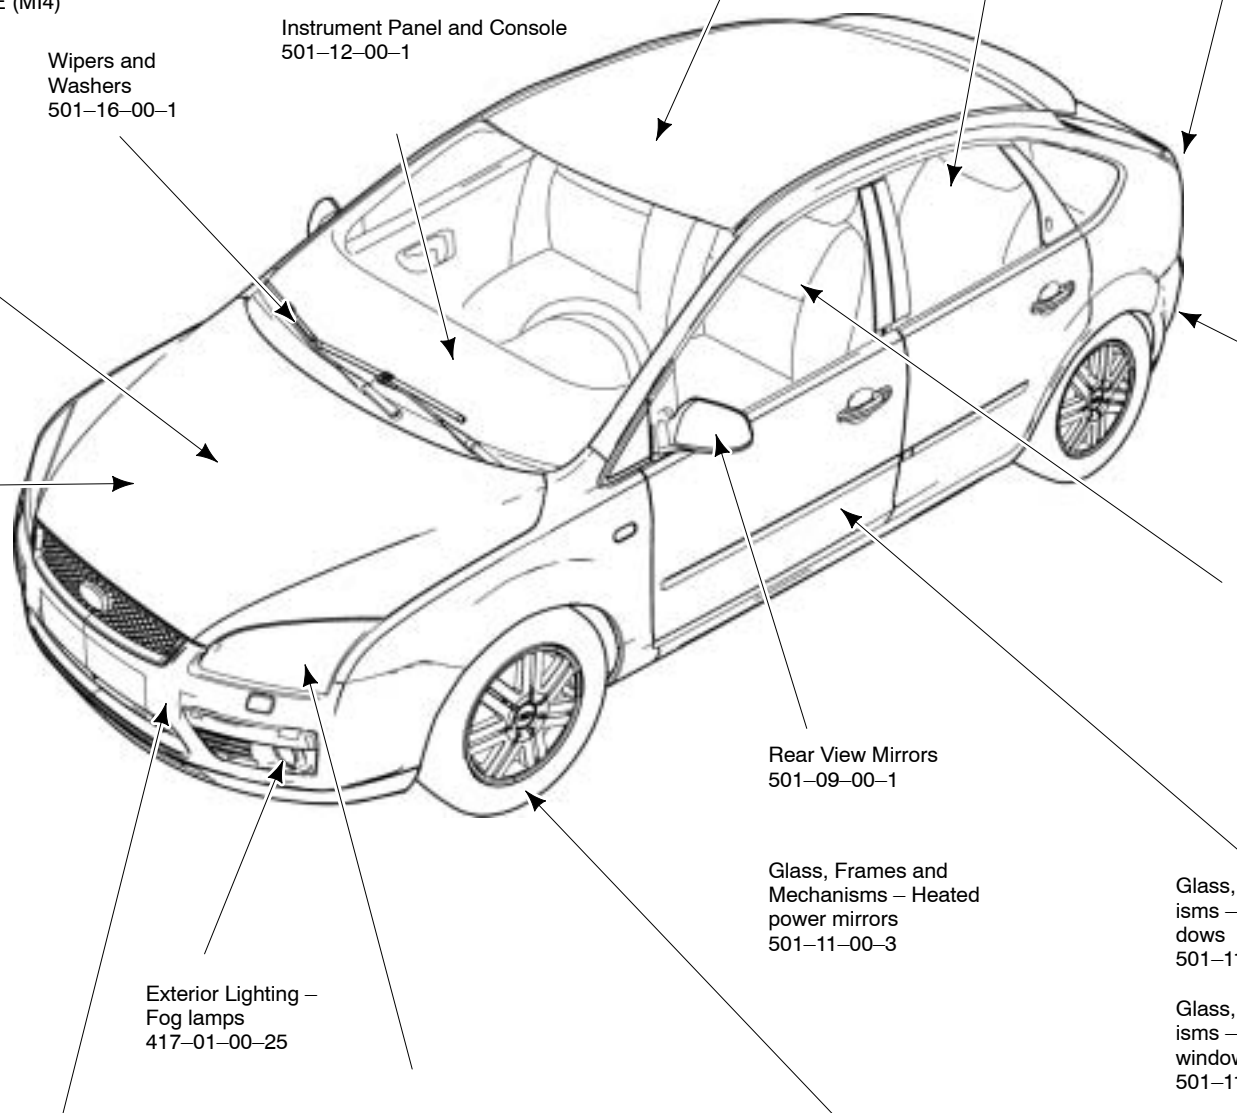

Exterior Lighting – Headlamp  
leveling  
417-01-00-3

Exterior Lighting – Turn Signal  
Lamps  
417-01-00-13

Exterior Lighting – Position  
and Parking Lamps  
417-01-00-21

Exterior Lighting – Fog lamps  
417-01-00-25

Parking Aid

## Note

All wiring connections between components are shown exactly as they exist in the vehicles. It is important to realise, however, that no attempt has been made on the schematic to represent components and wiring as they physically appear on the vehicle. For example, a 4-foot length of wire is treated no differently in a schematic from one which is only a few inches long. Furthermore, to aid in understanding electrical (electronic) operation, wiring inside complicated components has been simplified.

## Complete Circuit Operation

Each circuit is shown completely and independently in one chapter or “cell”. Other components which are connected to the circuit may not be shown unless they influence the circuit operation.

## Current Flow (1)

Each cell normally starts with the component that powers the circuit such as a fuse or the ignition switch. Current flow is shown from the power source at the top of the page to ground at the bottom of the page.

## Switch Positions (2)

Within the schematic, all switches, sensors and relays are shown “at rest” (as if the ignition switch were OFF).

## Splices (3)

An arrow indicates that the splice is not shown completely. The page where the splices appears in full is listed in the Index.

## Boxes (4)

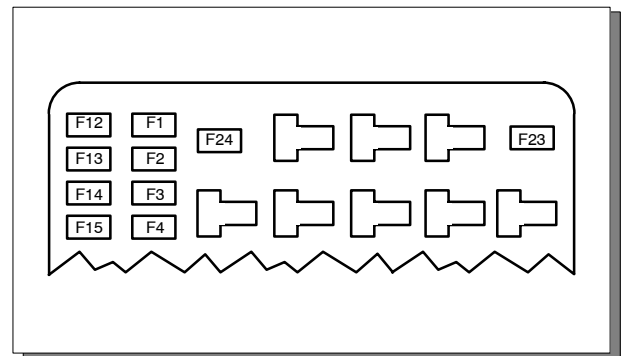

A thin dashed box on a schematic indicates a part of the circuit which is only present for a particular vehicle model, country, or option. These qualifiers will be shown next to the box on the schematic.

## Component Names and Notes (5)

Component names are placed on the right hand side of each component. Any notes that describe switch positions or operating conditions follow the name. Descriptions of the internals of the component (e.g. “Speed sensor”) are also included here.

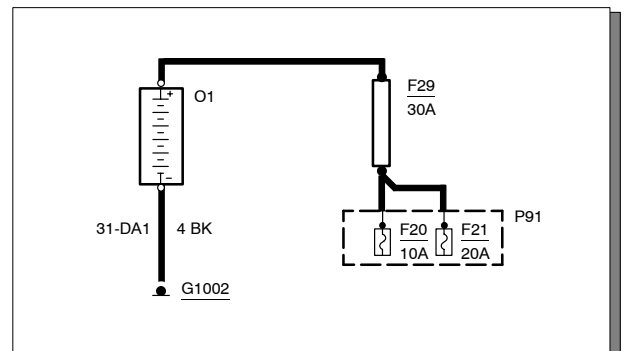

### Fuse and Relay Information

The “Fuse and Relay Information” cell (700-01-00) contains a view of the Fuse-/Relay Box in which all fuses and relays are identified. Cell 700-01-00 also specifies in table format which circuits/systems are protected by each fuse.

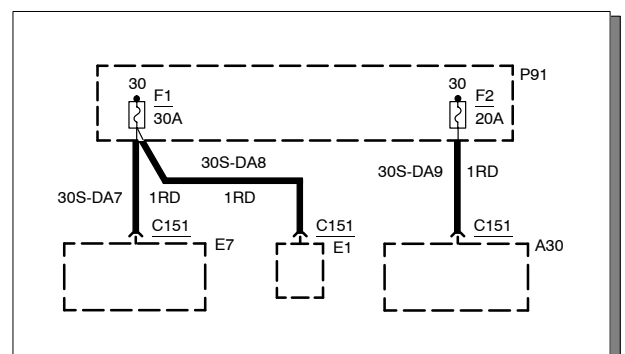

### Power Distribution

The “Power Distribution” cell (700-02-00) shows the current feed circuit. The current path is shown from the battery to the ignition switch and to all fuses.

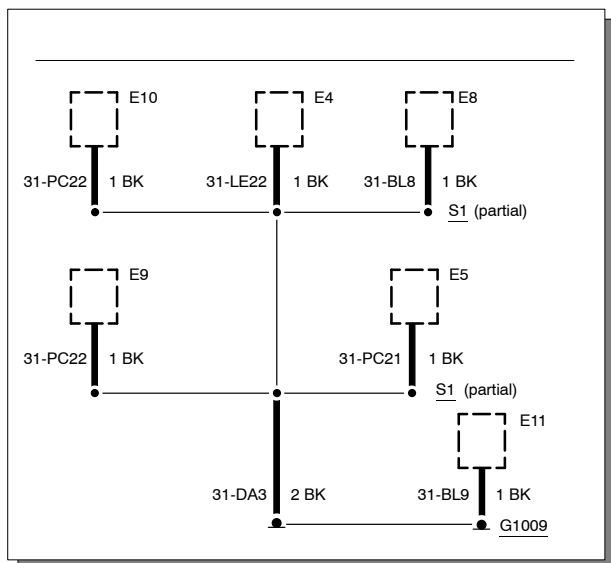

### Fuse Details

The “Fuse Details” cell (700-03-00) shows the circuits protected by each fuse. The circuit is traced from the fuse to the component. All details (wires, splices, connectors) between the fuse and the first component are shown.

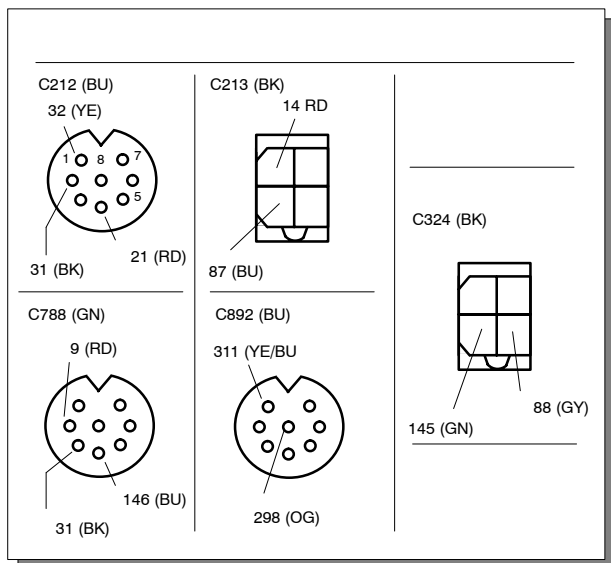

### Ground Distribution

Cell 700-04-00 contains the schematics that show the complete details for each ground connection or main ground splice. This is useful in diagnosing a problem affecting several components at once (poor ground connection or ground splice). All Details (wires, splices, connectors) between the ground point and the components are shown. These ground connection details are shown here in order to keep the individual cell schematics as uncluttered as possible.

Splices with a large number of wires may be split in order to improve the graphic representation. A thin line is then used to indicate the unity of the split splice.

### Component Identification Information

Component Identification Information begins in cell 700-06-00 and consists of

- (1) Component Location Chart (List),
- (2) Component Location Views, and
- (3) Connector Views (Faces).

The **Component Location Chart** helps the user find where the various items depicted on the schematic can physically be found on the vehicle. A brief written description of the location is given, along with a reference to the component location views.

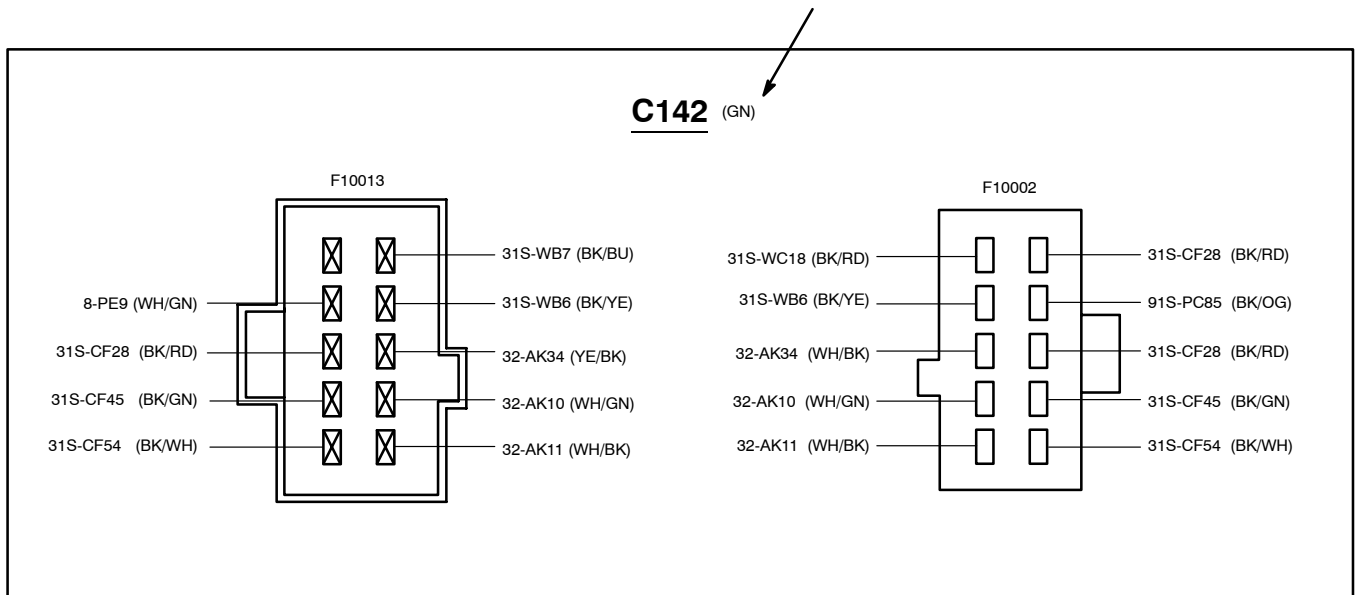

The **Component Location Views** show the components and their connecting wires as they can be found on the vehicle.

The **Connector Views** show the cavity or pin locations of all connectors. They are shown as they would appear to a user probing the wires with the connector disconnected.

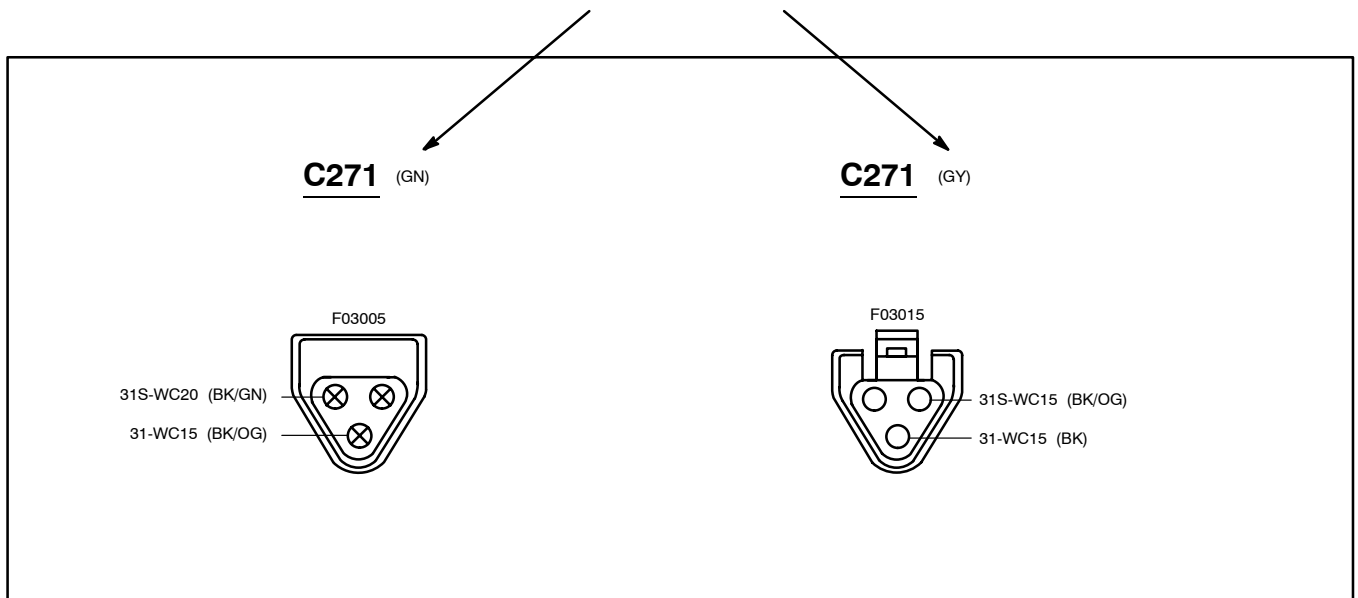

**Note:**

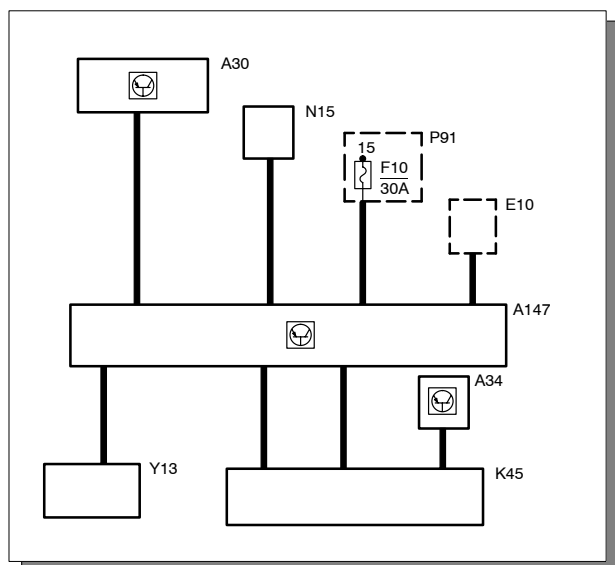

Connector colours are portrayed in the following manner:

when both sides of the connector have the same colour

when the male and female sides of the connector have different colours

## Block Diagrams

Block diagrams can be found at the beginning of some cells. These diagrams provide an overview of the systems detailed on the pages that follow them. All components connected to the control module are shown in order to provide easy understanding of the system component interactions.

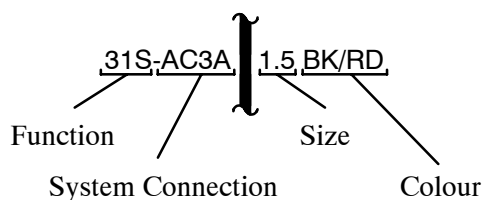

## Circuit Numbering and Wire Identification

### Circuit Numbering:

Ford has introduced a world-wide uniform system for circuit numbering and wire identification. The system is called Function - System Connection, or FSC for short.

FSC was developed mainly to assist in vehicle development and production processes, but is also helpful in helping the technician troubleshoot electrical circuits.

Example:

Function:

The first two digits identify the function of the wire. In this case, the function code includes the letter “S” to indicate it is an additionally switched function. The function part of the circuit number is the most helpful to the technician in troubleshooting a circuit. The function codes are based on some DIN designations used previously, with new numbers added for overload-protected functions, sensor functions, data links and special electronic module functions. A complete list of function codes and their descriptions is included in cell 100-00-04 “Symbols”.

System Connection (including branch):

Systems are related to subsets of the vehicle circuitry. A complete list of the system codes can be found in cell 100-00-04 “Symbols”.

Immediately following the system letter code is the connection number specific to that system. A branch identification is used to differentiate wires in one connection with the same function.

**Wire Identification (wire colours):**

The wire identification consists of a basic colour and an identification colour, and is determined directly from the wire's circuit number. In the wiring diagrams the wire colours will be located separately next to the wires as before.

The basic and identification colours are abbreviated using the international norm IEC 757. The abbreviations are listed in cell 100-00-04 "Symbols".

Each function code has a specific basic colour associated with it which can also be seen in the chart of function codes in cell 100-00-04 "Symbols". The identification colour is a coloured stripe used to differentiate several wires with the same function within one component connector.

One essential difference from the previous wire colouring system is the change of some of the basic wire colours. Ground circuits, previously assigned the basic colour brown (BN) are now black (BK).

Using the circuit number and wire identification used in the above example we know the following information about the wire.

31S-AC3A } 1.5 BK/RD

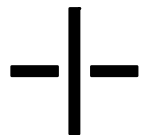

|             |                                                                                                          |
