This exploded view diagram illustrates the assembly of a mechanical component, likely a valve or actuator. The components are numbered 1 through 10:

- 1**: A small cylindrical pin or plug.
- 2**: A large, dark, cylindrical base or housing.
- 3**: A long, thin rod or shaft.
- 4**: A small, dark, cylindrical component, possibly a seal or O-ring.
- 5**: A complex, multi-faceted metal bracket or arm.
- 6**: A long, thin rod or shaft.
- 7**: A small, dark, cylindrical component, possibly a seal or O-ring.
- 8**: A small, dark, cylindrical component, possibly a seal or O-ring.
- 9**: A coiled spring.
- 10**: A small, dark, cylindrical component, possibly a seal or O-ring.

The diagram shows the relative positions and assembly sequence of these parts. The base (2) is at the bottom, with the rod (3) passing through it. The spring (9) is positioned above the rod. The bracket (5) is shown to the left, and the rod (6) is shown to the right. The various seals (4, 7, 8, 10) are positioned around the assembly points.

This diagram illustrates the components of a mechanical assembly, numbered 1 through 16. The parts are shown in an exploded view to indicate their relative positions and assembly sequence. A dashed line encloses parts 1, 2, and 3, suggesting they form a sub-assembly. Part 1 is a central shaft or housing component. Part 2 is a flange or end cap. Part 3 is a small circular component, possibly a seal or washer. Part 4 is a curved bracket or arm. Part 5 is a small cylindrical component. Part 6 is a large gear or sprocket. Part 7 is a small circular component, possibly a seal or washer. Part 8 is a long bolt or screw. Part 9 is a long, thin chain or belt. Part 10 is a long, thin plate or bracket. Part 11 is a small circular component. Part 12 is a small circular component. Part 13 is a small circular component. Part 14 is a small circular component. Part 15 is a small circular component. Part 16 is a small circular component.

This diagram illustrates the assembly of a piston and connecting rod. The components are labeled as follows:

- 1:** Points to the piston assembly, which includes the piston head and the connecting rod.
- 2:** Points to the piston rings, shown as two separate rings.
- 3:** Points to the piston pins, which are small cylindrical components used to secure the piston rings.
- 4:** Points to the piston head gasket, a circular component with a central opening and four mounting holes.
- 5:** Points to the piston pin clip, a small component used to secure the piston pin.
- 6:** Points to the connecting rod, a long cylindrical component that connects the piston to the crankshaft.

An exploded view diagram of a mechanical assembly, likely a pump or motor component. The diagram shows 12 numbered parts arranged in a linear fashion from left to right. The central part is a large, complex housing (2) with a vertical shaft (1) extending upwards. To the left of the housing are two small circular components (9 and 10). To the right of the housing is a series of smaller components: a small circular part (3), a small rectangular part (4), a small circular part (5), a large gear (11), a smaller gear (6), a small circular part (12), a small circular part (7), and a small circular part (8). The components are shown in a perspective view, with the housing (2) being the largest and most complex part.

An exploded view diagram of a mechanical assembly, likely a pump or motor component. The diagram shows eight numbered parts:

- 1**: A large, complex housing or base plate with a central circular opening and a flange.
- 2**: A cylindrical component with a flange, shown in two positions relative to the housing (1).
- 3**: A small, rectangular block or spacer.
- 4**: A large gear or impeller with many teeth, mounted on a central shaft.
- 5**: A circular flange or ring component.
- 6**: A long, thin cylindrical shaft or pin.
- 7**: A small bolt or screw.
- 8**: A small, irregularly shaped component, possibly a seal or gasket.

The diagram illustrates the assembly sequence and relative positions of these components. A bracket connects the housing (1) to the two positions of component (2), indicating they are interchangeable or represent different states of the same part.
